

**OUR MANIFESTO**

Since 1832, we have been rallying men and women to protect everyone's home and living spaces and to improve everybody's daily life.

**We are truly passionate about discovering more about wood and materials,** always inspired to learn about new developments and trends. As dedicated and tireless explorers, as a result of scientific research, we are developing cutting-edge eco-friendly technologies that can help us to develop protection, maintenance, embellishment and decoration techniques, towards higher levels of performance to make your projects a success.

**Early, pioneers in environmental friendliness, and we still are to this day,** providing professionals and DIY enthusiasts with next-generation high-performance bio-based products, offering full traceability for our raw materials.

**We firmly believe in more collaborative and responsible industry.**

We think that co-creation, collaboration and the bond that we share with our customers and partners are the only way to go beyond the limits of our know-how. We raise awareness among the stakeholders in our value chain of the need to take different actions and adopt new and more sustainable products.

**We know our collaborators' passion and engagement is the beating heart of our Group.**

We seek to ensure complete security in order to foster boldness in innovation and make talent blossom.

**BLANCHON Group is a space that is dedicated to technological and environmental innovation and the creativity of everyone who wants to leave a lasting mark on the future.**
